DETAILED ACTION

Drawings

1. The drawings are objected to because they continue to contain excessive text. In view of the art cited below, the examiner defers the necessity of correction of these drawings in order to spare applicant unnecessary expense.
2. Claims 1-3 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Higdon or Salsbury et al..

The claim is directed to the subcombination cover assembly, shown in the drawings of each patent above.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haddad, Jr. in view of any one of Delp, Salsbury et al., Kuss et al., Reynolds, Barry, and Higdon.

Haddad, Jr. shows the open top dumpster without cover. It is not legal to transport debris in an open top container in the United States, therefore the use of a cover as taught by any one of the above references, each of which hooks-on to the top rail of the container without alteration and limits exposure to the environment as well as access to the contents, would have been obvious to one of ordinary skill in this art for the ease of attachment.
